

Touchpanels

Crestron launched an industry when it introduced the world's first touchpanel.

We continue to innovate the technology we invented, delivering maximum value to every client. As the premier source for touchpanels, Crestron offers more than 100 models to choose from. Crestron delivers the only touchpanels with embedded PCs, HD video display and enhanced wireless communication. From 3.6" to widescreen 17", from handheld to wall mount to tabletop designs, from sleek edge-to-edge glass veneer to architectural series faceplates, there's a Crestron touchpanel for every room and every budget.

The perfect complement to a conference table, coffee table or nightstand.
No need to get up or walk across the room to a switch or a keypad on the wall.

Complete control is always at your fingertips. With several models to choose from,
select just the right size, design and features for any room, application or décor.

Replace the litany of light switches and dimmers, fan controls, thermostats, volume knobs, intercoms and alarm keypads with a sleek, modern Crestron touchpanel.

Mounted on the wall, simply walk through the door and tap the screen to wake up the room. Crestron touchpanels unify control of all devices, systems and technology into one simple graphic interface. There are small touchpanels for foyers, lobbies, bathrooms and corridors. Larger touchscreens are ideal for family rooms, conference rooms and auditoriums, and can also serve as flat panel video displays and Web interfaces.

There's no need to be tethered to a conference table, podium or any single room. Roam as you want and stay in control of all AV, lights, shades, thermostats and more.

There are several models to choose from, including a 3" handheld WiFi touchpanel that supports metadata display and streaming video; a 6" 2-way RF touchpanel that offers a full size screen and also connects via Ethernet to display full motion video, and an 8" WiFi panel that features a built-in Web browser and PC applications.

Turn the full size computer monitor or video display already on your desk, podium or wall into a Crestron touchpanel controller. Reduce clutter and enhance the user experience by unifying computer, video and room control onto a single display.

The onscreen graphics emulate a full function Crestron touchpanel and provide a consistent interface design with actual Crestron touchpanels installed in other areas.
